"STIP Too" v *5.6* Available - *Now!*

The "STIP Too" computer software program has been *updated* for the Six-Year Transportation Improvement Plan (TIP) form and for STIP data. We are providing this software application to **all** local agencies free of charge and are encouraging its use. This program will provide your agency with a permanent record of your TIP, as well as, a vehicle for ***electronically*** submitting your **selected & planned** projects to your MPO, RTPO, and/or Regional Local Programs office for inclusion into the Statewide Transportation Improvement Program (STIP). Since we are distributing this software program statewide (to cities, towns, counties, ports, transit agencies, tribal nations, MPOs, RTPOs and to WSDOT regional offices), we expect a significant time savings for **all** users in compiling their local TIPs, the MPO/RTPO TIPs and, finally, the Statewide TIP (STIP). This will allow your project funding to be accessed more quickly. This program, in Windows and Macintosh versions, is ready for distribution either by **Internet download** or on **CD**.

The website address is: **http://www.wsdot.wa.gov/TA/ProgMgt/STIP/STIPHP.HTM**

To request this TIP software program on CD, please fill out the application below and return it to me.

Windows *Y2K/XP or higher* ☐   **CD?**   Yes ☐   No ☐

Macintosh Version ☐
